

COVID-19 Statement - **Important update from Foam Engineers**

Date: 30 March 2020

To our valued customers, partners and suppliers,

Notice to close production and deliveries over the Easter period

The escalation of the COVID-19 pandemic continues to impact us all in our personal and professional lives. The health and safety of our work force, their family and loved ones and the local community is our absolute priority in this fast changing and evolving situation. We are continually reviewing official guidance and adjusting our response daily to keep all concerned updated, while also monitoring market conditions closely.

In the past few days, a number of our important and key customers have announced that they will be working shorter hours or will close their facilities. Foam Engineers will continue to work closely with you answering your enquiries and delivering your goods as best we can over the next few weeks.

Support for business, announced by the UK Government, is being incorporated into our planning and we are closing our production unit from the 3rd April to 20th April to take advantage of this support.

In anticipation of our return after Easter we have built up buffer stocks of raw materials so that we can ensure continuity of supply of technical foam products. We have been planning our business resilience strategy now for many years and are confident we can maintain supply during this difficult period.

Should you have any immediate and short-term order requirements or, if you have a new opportunity to discuss, then please do not hesitate to contact our sales team and will do our very best to accommodate. During this shut-down period contact details can be found on the Contact Us page on our website.

We thank you for your continuing support and custom, we wish you and your families well during these worrying times.

J V Wiles
